About our brand

Monument Tools is an Innovative, UK based, Privately Owned company which Designs, Manufactures and Markets Professional Quality Tools for Plumbing, HVAC and Drainage under the Monument Brand and via OEM.

Monument Tools sells to Trade and DIY through Selected Wholesale, Merchant, Retail and Export Partners.

The Monument Brand is 90 years old and the company which is still managed by the Collier family continues to invest in the latest technology. The products range from small pipe cutters up to £5000 High Pressure Jetters. Many products used by Professional Tradesmen have developed generic names such a Shetack or a Monument.

Stocking Monument

All customers differ in their perception of brands as well as their own customer profiles and we believe merchants should have the ability to offer for sale the correct range of Monument products based on the client's customer profile.

Quality, Value, Flexibility and Customer Service are the cornerstones of our philosophy. We continually adapt the vast experience and extensive knowledge gained over the last 140 years, to the ever increasing and diverse demands of today's and tomorrow's market.

Monument Sweatbox®

Scan to learn more

The Monument Sweatbox® allows engineers to solder or sweat a new joint up to 22mm diameter, on site, in a domestic property without having to cobble together some kind of makeshift holding device.

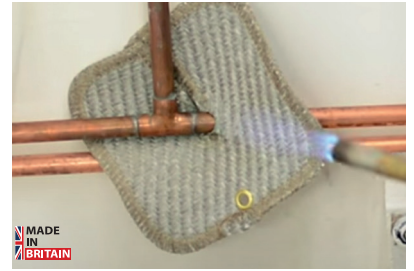

The Sweatbox features an engineering grade plastic with a patented clamp for holding different sizing of copper pipe up to 22mm. There is a silicone strip edge to the Sweatbox ensuring heat is not conducted from the hot copper pipe to the plastic of the Sweatbox or the clients property.

The sealed compartments are ideal for holding a gas bottle, separated torch and all the essentials needed for soldering or sweating a joint. There's even a compartment for flux brushes.

Use the Sweatbox in conjunction with the Monument Masters Sweatcloth as well as a Monument Soldering Mat

Monument Olive Pullers

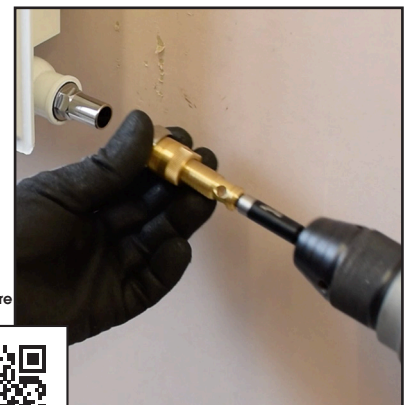

Monument Olive Pullers works by engaging the tool in the end of the copper pipe and then winding the appropriate bush - **15mm** and **22mm** included - counter clockwise until it stops at the olive to be removed. The threaded bush is then screwed into the compression nut which is held captive on the pipe on the other side of the olive. Then by rotating the handle clockwise the compression fitting nut is drawn up the pipe and pulls the olive off the pipe without damaging it.

Monument **GRIP+** Professional Adjustable Basin Wrench

The Monument Professional Adjustable Basin Wrench is considered to be the best tool for the job due to its small head size. It represents **innovative progressive design** from the original Shetack Basin Wrench (327R) from 1929. It is not fitted with a spring to the jaw to keep the size of the head small. The end of the handle has a hex so that an extension bar can be added to increase access and leverage. Operating length 250mm, T/Bar 105mm.

Drainage

Monument is an Innovative, UK based, ethical, privately owned company which designs, manufactures and markets professional quality tools for plumbing, roofing and drainage under the Monument brand and via OEM.

We sell to trade and DIY through selected wholesale, retail and export partners. Products range from small patented pipe cutters up to high pressure jetters. Many products used by professional tradesmen have developed generic names such a 'Shetack' or a 'Monument'.

The Monument brand is 90 years old and the company, which is still managed by the Collier family, continues to invest in the latest technology.
